To Whom It May Concern:

We are opposed to the current proposed Rocky Mountain Power poles route. We enjoy the beautiful mountain view behind our home and know that the current route would spoil this view and lower property values. In addition, we are concerned about the safety of such big voltage lines close to our homes. It also doesn't seem to make sense to put them on a known fault line. We feel that there are other less noticeable, less intrusive and safer routes for these needed power poles.

Sincerely,

Grant and Valerie Robertson
