Rocky Mountain Power is preparing to build a new high-voltage power corridor through our area.

Recently a change in route was made which puts high-voltage lines running right over and through our neighborhood. The new change will completely take out our neighbor's house! And his home is not the only one that will happen to. We have heard of 11 other homes that will be obliterated.

Please lend your support to the U&I Concerned Citizens Group and the local Council of Governments. They have proposed two other routes that would be less disruptive to people's lives.

Sincerely,

*Stephanie L. Pungil*
