Reference: DOCKET NO. 10-035-39

RECEIVED

My husband and I are completely opposed to Rocky Mountain Power's intent to install power lines and king-size power poles that will either cause or exacerbate health problems in Tooele citizens, will cause contamination of our water, will ruin the best "view shed" in the city, will devalue properties and will not be an advantage to anyone except Rocky Mountain Power. A viable alternative exists. As good citizens interested in preserving the environment, Rocky Mountain Power should implement that alternative.

Paulette Studdert
