RECEIVED

Being a resident of Tooele for the pas 11 years I have really enjoyed the beauty of this valley. I enjoy my home which has a wonderful back deck that I can view the entire Tooele/Grantsville area. It is beautiful.

I have attended the meetings held at the City of Tooele and at the County in reference to the proposed power line route. The citizens have gone out of their way to try to find ways that these power lines could be placed with minimal disturbance to the residents.

It seems there is a mind block with Rocky Mountain Power. They are damn well going to do what they want.

The last time I checked this County is still part of the United States. The people have a voice in how they live! We do not want these power lines going through the Tooele Valley the way Rocky Mountain Power has proposed. The City and County have voiced their reasons and I do not feel it is necessary for me to expand on them. Do not allow RMP to do what no one wants!
