Please, please, please consider alternate routes for the proposed Rocky Mountain Power lines, rather than the Oquirrh Mountains. I have lived in Tooele for 18 years and the mountains are the beauty in this valley. The proposed line would completely tear up our beautiful mountain range as well as come very close to many homes. The south and east parts of Tooele are constantly growing and starting new subdivisions. This is right in the area of the proposed line. Please consider routes further west that would impact way less people. I have never been one to write in protest of something going on. I usually feel like my voice won't make a difference, but in this case I have to at least try. There are many, many people who feel the same way I do. Please know that your decisions will affect countless people's lives. Please try to find another way.

Thank you for your time,
Valerie Ekins
