Tina Baresh

Dear Commissioners,

I am writing because of my concern about raising the price of CNG for alternative fuel vehicles. I have been considering converting my vehicle to run on CNG since June of 2008. If Docket 07-057-13 passes I will definitely not convert my car due to the already high cost of the conversion and the fact that I will never break even financially.

I want to convert my car so that I can help reduce our country's dependence on foreign oil and to help reverse Utah's air pollution problem. It's important to me and thousands of other Utahns that we keep our state a clean and desirable place to live.

Please help us to do this by re-opening Docket 07-057-13 for public comment and removing the NGV rate decision until the broader policy issues of Docket 08-057-21 are decided upon. I also ask that the "Wexpro" natural gas price continue to be included in NGV rate calculations.

Respectfully,

Tina Baresh
