SUBJECT:

i thought we had finally figured out how to save our enviroment and get out from under foreign oil , guess i was wrong. why did i spend 17000 on a cng vehicle,do my part to reduce emissions, and try to stop our crippling dependance on foreign oil just to have the cost of cng ruin everything. should i spend another 10000 to fill my vehicle at home ? cant afford it! the economy has forced many construction companies to go under or cut costs cng trucks are how alot of them have stayed alive, myself included. please help
