Subject: Cng Price Increase - Please Read

Owning a CNG vehicles comes with a hefty price in maintenance and time . Short range of vehicle and lack of infrastructure are the hidden price I face everyday. The decision to discriminate between residential users and vehicles users isn't an appropriate one and I urge you to review and take action for this change not to occur

This modification in the price goes against the common interest of residents of a city with high content of pollutants in the air . We should applaud and support the use of alternative fuel.

Sincerely
Josh A Chocho
