RECEIVED

Dear Sir:

I wish to thank you for your support of CNG, I had it installed in my Windstar Van at a high cost, being 80-yr old I did not receive and kick backs, just to help with the CLEAN AIR WE BREATHE. (your right it will take me the rest of my life to pay for it between cng and gasoline prices.)

CNG cars go from SLC to northern Calif.

To get there you have to go to Southern Calif then up to Northern Calif.

There are Companies that handle cng compressed tanks on trailers so a new tank can be brought in when it is empty.

Highway 80 is the quick way to Northern Calif.

WE NEED A FILLING STATION FOR CNG IN WENDOVER.

That would make SLC- Wendover- Reno- and any where in Calif to save time and money.

Thank you taking care of this.

Phil Herbert
