Subject: CNG price hike

Your attempt to misalign my cost of Natural Gas for my vehicle at a higher rate than that required of other Questar gas users is unethical. Please reconsider. Not only does such a move hamper Utah's strong public support of alternative fuel sources from our own region, but it will damage private support which helps fund and create a real infrastructure. Further, it targets me as an CNG vehicle user as against other Natural Gas users in Utah only on the basis that it may be used by some out of state drivers? It just doesn't make sense. Protect the Utah CNG drivers, not punish them.
