Subject: CNG Infrastructure in Utah

Mr. Livingston,

I understand you are on the Public Service Commission?

Please consider the issues associate with Questar having a pricing structure appropriate for the maintenance and expansion of fueling locations. CNG is a good, viable transportation fuel the would use local resources (Wexpro), improve air quality (I live on the valley floor, could not exercise, and had severe headaches this last inversion, my child got a sinus infection), and reduce our dependence on oil. Sounds like a win-win to me. Additionally, if stations were more prevalent, CNG auto sales would increase. Regional gas resources should be considered in the pricing of CNG within our state. Will a public hearing be scheduled to review these issues?

I am a citizen of this beautiful state (five generations) and am dismayed at the rapidly deteriorating air quality.

Thank you for your consideration.

Kirsten Peterson
