Subject: Future of CNG refueling

Dear Sir, please ensure that Natural Gas Vehicle Refueling remain under the Public Services Commission and do not open it up to a privatized monopoly. The worst thing that can happen to the burgeoning NGV industry in Utah is for refueling to fall into the hands of privateers like Clean Energy Corporation and the ensuing and unnecessary significant hike in natural gas prices. This would literally KILL the ngv industry that is still in its infancy here in Utah. The best solution is to put control of refueling in the hands of a non-profit 501 c3 which answers to the PSC. This is in the PUBLICS BEST INTEREST not private sector interests who will take as much as they can from the utah people.

Thank you for your time.

Sincerely,

Andrew Scotson

President
