Subject: ATTN: Ted Boyer - Wexpro Natural Gas

Dear Mr. Boyer,

UTAH PUBLIC
SERVICE COMMISSION

The news regarding the recent PSC decision to exclude NGV owners from the Wexpro natural gas resource is very disturbing.

2009 JAN -8 P 12: 01

RECEIVED

In these times of energy crisis and the uncertainty that seems to always lurk regarding oil and gasoline I personally feel this move will cripple the development of a stable and economical CNG program in the US and especially Utah. CNG is one of the most viable options we have to relieve our dependency on foreign oil, I don't have to preach this though, you know it is the case.

I urge you to put this decision to the public and let them decide what their best interest is. Utahns helped pay for the Wexpro resource, they should have a say in how and by who it is used. To exclude this resource from the people who are driving NGV's is absurd. At the very least the PSC should see the error of their ways and fix this problem themselves.

Thank You,

Doug Spencer
