SUBJECT:

I am concerned about the impending cost increase for CNG (compressed Natural Gas) used to fuel vehicles. I don't understand why we are allowing Questar to do this. I would hope that we could see the benefit of doing everything possible to promote the use of Nat. Gas. We should be finding funding to build the necessary fueling stations in other ways. By allowing the increase, the demand will disappear. Only Questar will benefit.
We need to promote the use of CNG, it saves the environment, and moves us away from our dependnece on foreign oil.

TThanks Clark
