Re: Rural counties requesting all state residents to pay for rural gas services.

Complaint:

I am against all state residents having to pay for rural gas services to rural residents. Those residents chose to live in rural Utah, knowing the cost for living in a rural area is greater as compared to living in an established community. No one forced them to live in a rural area, that was their choice. They should be willing to take care of their own costs without everyone else have to pay for their utility services.
