Subject: Questar's subsidized expansion request

The 800 pound gorilla (Questar) wants their rate base to subsidize their utility expansion. Wow. Does Utah really want to see all of its rural lands developed in the next 5 years? What about fair competition. I'm a Wholesale Propane Marketer and the Propane Industry should not have to compete with utilities subsidizing their expansion. There is no precedent for this anywhere in the country. Questar is trying to flex their political muscle to the detriment of the citizens of this State.
